

# The requested URL could not be retrieved

---

While trying to retrieve the URL: <http://www.novedea.jp/>

The following error was encountered:

Unable to determine IP address from host name for *www.novedea.jp*

The dnsserver returned:

Name Error: The domain name does not exist.

This means that:

The cache was not able to resolve the hostname presented in the URL.  
Check if the address is correct.

Your cache administrator is [webmaster](#).
